

GNG COMMUNITY

GNG Community and Why you need to be a part

When you become part of a community business opportunity, wouldn't it be nice to know what your money is going into? That's called transparency, and this is exactly what you will get when you purchase one of our brand building NFT's and become a GNG community member! The great thing is that you get so much more than just an NFT, you gain access to experienced mentors, education, affiliation, team building and the feeling of being a part of something special and unique, together with a team in a thriving community that share the same goals and aspirations. The positive result of all these collaborative

factors is that you, together with your team will have access to an amazing extra income earning opportunity, dividend pay-outs, a long-term upside and security, with our very own PNGVN Token and we do this together with YOU, because the community is the key to long term success for all. This is what we at GNG call the perfect synergy, a combination of the best elements of community marketing, with traditional financial market strategies, that have been used to create wealth for hundreds of years and now accessible to the masses through our simple and inclusive opportunity.

*It's all in the numbers is our mantra. We, as a company acknowledge that the money coming from the sale of our NFT's is not ours, it belongs to the community and we only manage this on behalf of the community for the best possible gains. That's why we say that we have only **100%** to account for, nothing more and nothing less, it's all in the numbers and the numbers are in our favour.*

100%

50%

of your money goes towards community rewards, so when you sign up and start to collect our brand building NFT's, 50% goes to the team that sponsored you and helped your success in our system, in a simple, easy to replicate rewards plan. This is an appreciation for the work done before you and for the value bought into the PNGVN Token and recognition to those who have given you the opportunity to be a part of the thriving GNG Community. This makes it a fair, open and transparent business transaction and the reason why community marketing is the best business model in the world, if it's done correctly and those that follow the system are rewarded fairly

20%

of your money goes to the entire community for dividend pay-outs to the PNGVN tokens. This is how we create unity, from team building to community building. We strongly believe that we are all in this together to support and build one another. This will drive the community forward in the most positive way, where true value will be recognised and supported by all.

25%

of your money goes to investments in the NFT and Crypto market, expected to rise exponentially in the coming years. We, as a company, will invest these funds wisely on behalf of the community to gain maximum profit in our selected markets. This is the long-term security for our community. When the predictions for the NFT and Crypto markets kick in, we can all share a very lucrative future with the PNGVN Token. We are using the same business model as the financial markets have used for hundreds of years, for long term wealth gains. We structure our token as a fund, or more correctly, an index fund. We will not invent anything, we will not risk anything, we will only invest in companies, coin and tokens after a thorough due diligence process and with a strict diversification strategy

5%

of your money is for the company, so we can run GNG wisely on behalf of the community. Again, wisely is the key word because this money should cover all the company costs, including quarterly events for the community. We want GNG to be a vibrant community, where positive experiences and life growth is a big part of the picture offering all the same opportunity for financial freedom. With quarterly events all over the world, all of our NFT and Token holders will have the experience of being part of an event for learning, growth, entertainment and a place where we all have one thing in common: Building a community where everyone is rewarded, where everyone is equal and with the same equal opportunity for all.

Negative people will say: This is network marketing, and you are dependent on new clients entering the system at all times! We are not depending on new clients coming in, but it will help to achieve a greater success. You have to remember; every business is dependent on new clients coming in. If, for example, McDonalds did not get any new clients coming in to buy their meals, even a successful business like McDonalds, would have to close down. This is the same for any business across the world.

From past experiences people are asking us what the security for the token is, to prevent it from getting pumped and dumped. To this there is only one thing to be said: This token is being built with real value and investments in the NFT and crypto space, therefore it is backed by true utility. So, if the token were to be dumped, all the sophisticated investors and financial institutions will readily buy this token up, because of the real value and dividend being paid out, and when token holders understand what they have with the PNGVN Token, it's very unlikely that they will sell, let alone dump it.

So, It's time to understand what we have in our hands with GNG and how we can change the landscape of business and offer a positive experience for all who join our community. GNG built for the community by the community, a real opportunity for all.

OUR BRAND BUILDING NFT'S

THE SOPHISTICATED PENGUIN

DID YOU KNOW?

- That the penguin is the most social of all species on earth.
- That they live in large groups (communities) their whole lives.
- That when they work (hunt) they work in groups from 5 – 20.
- That is why we are proud to have the sophisticated penguin as the creative brand identity of the GNG Community

ITS ALL IN THE NUMBERS
